SUMMARY

Engineering leader who loves working at startups and scaling them, fixing any and all problems as they crop up. Mentorship- and coaching-focused, building autonomous teams that balance execution, quality and people development.

EXPERIENCE

Apollo.io — Remote · Buffalo, NY

Engineering Lead, Core — Aug 2026 – Present
Engineering Manager II, Search & Discovery — Nov 2022 – Oct 2026
Engineering Manager, App Prospecting & Chrome Extension — Oct 2021 – Oct 2022

- Responsible for Apollo's Core pillar: Rep Experience, Controls, Deliverability and Warm Outbound.
- Manage a large organization with managers reporting directly; previously led the Search and Chrome Extension teams (9 engineers combined).
- Launched a cross-functional culture initiative within months of joining that became a lasting institution at Apollo.
- Significantly reduced the critical-incident backlog and drove meaningful technical documentation across the team.
- Work directly with customers and Customer Support on escalations, helping save at-risk accounts from churning; led Apollo's Tech Blog.

Barracuda FX (a Broadway Technology company) — Buffalo, NY

Senior Engineering Manager, Distribution Team — Jan 2021 – Oct 2021

- Led an engineering team of 9 on the flagship Dealer-to-Customer product; responsible for on-time delivery of critical customer-committed projects.
- Managed five direct reports; chosen to take over multiple failed projects and bring them back to on-time delivery.
- Led the audit and redesign of the company-wide process for customer escalations, reducing dispatch cost and the incidence of P1 incidents.
- Led the interdepartmental split of JIRA, Confluence and other backend systems for the company divestment, with zero impact to customers and billing.

Broadway Technology — New York, NY · Remote

Senior Software Engineering Manager — Mar 2020 – Jan 2021
Software Development Consultant — Jul 2016 – Mar 2020

- Developed, owned and supported trading applications on distributed systems, written in Python and C++, that traded hundreds of millions of dollars a day.
- Architect and lead developer of a bespoke distributed pricing solution; formalized a Python component wrapper that became the standard across multiple customers.

MentorCruise — Remote · Freelance

Mentor: coaching engineers and engineering managers — May 2022 – Present

Riot Games — Los Angeles, CA

Development Management Intern — Jun 2015 – Aug 2015

- Served as Lead Development Manager for the League of Legends 2016 Preseason, coordinating across teams, removing roadblocks and raising visibility on risk and scope.

EDUCATION

Cornell University, College of Engineering. B.S. Computer Science (Software Engineering concentration), Minor in Business
2016
