Work Experience

Engineering Manager

BarracudaFX (formerly Broadway Technology) || Spring 2020 - Present || Buffalo, NY

- Led an Engineering team of 9 working on the flagship Dealer-to-Customer product offering; responsible for on-time delivery of critical customer committed projects.
- Managed five direct reports, responsible for driving technical mentorship and championing career growth.
- Chosen to takeover multiple failed projects to bring back online and deliver in a reasonable time period.
- Led audit and development of new company wide process for fielding customer escalations. Reduced cost spent on dispatch, as well of incidence of P1 incidents.
- Led interdepartmental efforts to split out JIRA, Confluence, and other backend systems for company divestment. Drove alignment with key stakeholders and company leadership in rapid turn-around to ensure operational continuity and ensuring zero-impact to customers and billing
- Fostered a culture of automation by supporting non-engineer resources to learn how to automate aspects of their role to gain efficiency and experience.
- Owned weekly alignment with stakeholders on staffing and issue triage due to resource scarcity.
- Automated metric collection to enable a KPI-based approach to leading the team to successfully deliver on time

Software Engineer

Broadway Technology || Summer 2016 - Spring 2020 || New York City / Buffalo, NY

- Developed, owned, and supported trading applications on distributed systems that traded hundreds of millions of dollars a day, written in Python and C++.
- Developed functionality in Broadway's eCommerce suite to support a new asset class.
- Architect and lead developer of bespoke pricing solution across a distributed system
- Formalized and owned Python wrapper for building standardized components; now the standard solution in use across multiple customers

Development Management Intern

Riot Games || Summer 2015 || Los Angeles, CA

- Served as Lead Development Manager for Preseason 2016 of League of Legends.
- Coordinated work between teams, visualized workflow, regularly identified and removed roadblocks, rose visibility on risks and changes of scope.
- Used planning tools and Agile methodologies, and maintained communication channels to ensure successful, sustainable delivery.
- Assisted with story mapping, sprint planning, backlog grooming, and other scrum and kanban ceremonies.
- Facilitated Working Agreement Chartering of a newly spun up team, enabling team members to address long standing issues move toward a performing phase

Education
